## Consciousness

This second part is based on some newer theories on consciousness.

Johnjoe McFadden is professor of molecular genetics at the University of Surrey. His books include Quantum Evolution (2011), Human Nature: Fact and Fiction (2006) and, co-authored with Jim Al-Khalili, Life on the Edge: The Coming of Age of Quantum Biology (2014).

- - - - -

Is MM going to approach HI?

Likely not for quite a while.

MM = Machine Madness

HI = Human ImmortalityDate

## Why?

Well, it may all hinge on consciousness. Are we going to be able to program consciousness into a smart computer? If we assume consciousness is just a fast computational skill then we are likely to fail. However, as Johnjoe McFadden has theorized, consciousness may be the EM field coalescing and beginning a functioning state using cbits.

This idea of a Bio-Field is old and psychics claim to be able to see into this Aura/Bio Field/Conscious ElectroMagnetic Information (cemi) field.

Quote

Ideas, I propose, are the computation units of consciousness – its conscious ‘bits’ or ‘cbits’.

End Quote

AND, as I see it humans are quite a long way away from being able to manipulate something as ethereal as cbits in cemi fields. But, is it inevitable? Is it just a TECHNICAL issue to solve?

When that technical problem is solved then the push will be on for machines to claim sentiency and equality as a life form. Remember that at that point in time these machines will control the law.

## Quantum Computers

Ah, that FAST computational arrangement. Might those quantum **vomputers** be able to MODEL the interference patterns of cbits in the cemi fields? Gees, we are talking a new language now.

Note:

I am calling quantum computers by a new name so as to distinguish them as unique and also cause many typo errors. LOL Let's make it difficult.

Who said life was easy?

Vomputer = Very Fast computer

When a new, new computer comes out (a Cbit Vomputer) manipulating the cemi fields of the HARD WIRED quantum computer, then are we going to have Artificial Sentiency (AS)?

How long will it take quantum Vomputers (who control the laws) to declare AS equal to HS (human sentiency) with a small 'h' and a small 's' as we, as humans will be becoming of lesser importance and quite redundant here on Earth?

It's enough to scare the willies out of oneself. So, it is good that I won't be around when all that is rocking-the-world. Too bad! I'd like to give my opinion at that time.

OK

I'll give it now. LOL hehehehe..... Let's see, where to begin.....

I know, should a baby that was given life by two humans have rights of its own? Oh, gees not that.

Ok, Yes. Then should a baby life form that was given life in a human laboratory and is also sentient, also have rights of its own? AAAAAAAAAA..... EHEHEHEHEHEH..... ahahahah.....
